PROFESSIONAL SUMMARY

Senior DevOps Engineer with 5 years building production cloud infrastructure on AWS, Azure, and GCP. At Perizer, owns CI/CD architecture end to end -- GitHub Actions and ArgoCD across multi-environment Kubernetes clusters, reducing deployment times by 60% with zero-downtime releases. At Microsoft, maintained 99.99% uptime and cut cloud spend 30% through Terraform IaC and policy-as-code governance for ISO 27001 compliance. Built a production Python Kubernetes Operator that auto-manages Deployments, Services, and HPAs from a single custom resource -- a signal of platform engineering depth, not just operational skill. AWS SAA-C03 + AZ-400 Expert + KCNA certified. Strong on reusable Terraform modules, Prometheus/Grafana observability, and incident response with postmortem culture.

CORE COMPETENCIES

AWS Infrastructure & EKS

Kubernetes & GitOps (ArgoCD)

Terraform IaC (Reusable Modules)

CI/CD Architecture (GitHub Actions)

Prometheus & Grafana Observability

Incident Response & Postmortem

Cloud Security & Governance

High-Availability Systems Design

WORK EXPERIENCE

Perizer 2025 - Present

Senior DevOps Engineer

- Owned CI/CD architecture across multi-environment Kubernetes clusters using **ArgoCD and GitHub Actions**, reducing deployment times by 60% and enabling zero-downtime releases across development, staging, and production.
- Automated infrastructure provisioning with **Terraform reusable modules** across Azure and AWS, standardising deployments and eliminating manual configuration drift across all environments.
- Built and managed containerised workloads on **Kubernetes (AKS/EKS)** with Docker, enabling scalable microservices deployments with fault-tolerant design and automated horizontal scaling.
- Implemented end-to-end observability using **Prometheus, Grafana**, Azure Monitor, and Application Insights, maintaining 99.9% service availability and reducing mean time to resolution (MTTR).
- Led **incident response, root cause analysis, and postmortem** for distributed system failures, creating runbooks that prevented recurrence and reduced on-call burden.
- Enforced cloud security and governance through Azure Policy, RBAC, and automated compliance checks, strengthening the organisation's security posture and reducing audit findings.

Microsoft 2023 - 2026

Azure Cloud Support Engineer

- Built and maintained **Azure DevOps YAML pipelines** for automated CI/CD, enabling daily production deployments with zero downtime across enterprise client environments.
- Designed scalable cloud environments using **Terraform IaC**, reducing manual provisioning time by 40% through standardised reusable modules across dev, staging, and production.
- Hardened cloud environments with **Azure Policy and RBAC**, achieving 100% compliance with ISO 27001 standards -- implementing controls analogous to PCI DSS requirements for payments-adjacent workloads.
- Implemented **Azure Monitor and Log Analytics** with custom dashboards and proactive alerting, achieving 99.99% system uptime across all managed environments.
- Reduced monthly cloud spend by 30% through Azure Advisor recommendations, Reserved Instances, and automated shutdown schedules for non-production resources.

Azure Cloud Engineer Intern

- Configured and managed Linux and Windows VMs on Azure, ensuring availability and integration within virtual networks for enterprise applications.
- Implemented Azure governance through policies, management groups, and RBAC via Microsoft Entra, aligning resources with organisational standards.
- Monitored Azure resource performance using logging, alerts, and diagnostic tools, improving incident response times through proactive troubleshooting.

PROJECTS

Python Kubernetes Operator Platform Engineering

Built a production-grade Kubernetes controller in Python that allows engineers to define a single WebApp custom resource and automatically manages the underlying Deployment, Service, and HorizontalPodAutoscaler. Implements periodic health monitoring to sync deployment status back to the CR -- demonstrating infrastructure tooling depth beyond standard operations.

Python | Kubernetes CRD | HPA | Controller Pattern | Custom Resource

Kubernetes CI/CD Automation GitOps

Implemented end-to-end Kubernetes deployments on Azure AKS and AWS EKS, automated with Terraform, GitHub Actions, and ArgoCD for full GitOps delivery -- from infrastructure provisioning to application rollout.

Kubernetes | Terraform | GitHub Actions | ArgoCD | AKS | EKS

AWS Web Application Deployment Serverless

Built a serverless web application using AWS Amplify, API Gateway, Lambda, DynamoDB, and IAM for secure authentication and auto-scaling -- zero infrastructure management overhead.

AWS Amplify | API Gateway | Lambda | DynamoDB | IAM

Infrastructure Automation with Terraform

Automated deployment of Azure Function Apps, API Management, and FrontDoor with Terraform reusable modules, improving repeatability and cutting deployment time across environments.

Terraform | Azure Functions | API Management | FrontDoor

EDUCATION

B.Sc Computer Science — Kwara State University, Malete 2021

CERTIFICATIONS

Microsoft Certified: DevOps Engineer Expert (AZ-400)	Microsoft	2026
Kubernetes and Cloud Native Associate (KCNA)	CNCF	2025
AWS Certified Solutions Architect – Associate (SAA-C03)	AWS	2024
AWS Certified Cloud Practitioner (CLF-C02)	AWS	2023
Microsoft Certified Trainer (MCT)	Microsoft	2023
Microsoft Certified: Azure Administrator Associate (AZ-104)	Microsoft	2023
Microsoft Certified: Azure Fundamentals (AZ-900)	Microsoft	2022

SKILLS

Cloud: AWS (primary), Azure, GCP, DigitalOcean **Containers:** Kubernetes (AKS, EKS), Docker, ArgoCD (GitOps)
IaC: Terraform (reusable modules), ARM Templates, AWS CloudFormation **CI/CD:** GitHub Actions, Azure DevOps, CircleCI, Jenkins
Observability: Prometheus, Grafana, Azure Monitor, Application Insights, AWS CloudWatch, New Relic
Scripting: Python, Bash, PowerShell, Golang (scripting-level) **Security:** Azure Policy, RBAC, IAM, MFA, ISO 27001 controls
Networking: DNS, VPN (IPsec/IKE, Azure VPN Gateway, AWS Site-to-Site), Load Balancing, Firewalls, WAF
